

February 10, 2021 SEMC Meeting

Jeff Truss gave a presentation on the Environmental Health and Safety Emergency Response Team. There is 27 members split into 8 teams on an 8-week rotation. Teams on-call are the primary responders for the week. The team started out as a campus haz-mat team that cleaned biological, infectious disease, chemical, fire and gas responses. Since then, the team has been paired down and the team mainly deals with outside biological, chemical, fire and gas responses. There is an agreement between Bryan and College Station Fire Departments to assist in matters that are beyond the capability of the team on-call.

Updates:
